SUMMARY

I am a 3rd-year Information Technology student passionate about software development, networking, and innovative problem-solving. With hands-on experience in building web-based systems, creating chatbots, and configuring multi-layer networks, I enjoy tackling complex challenges and continuously expanding my technical skills. My goal is to leverage my knowledge to create impactful solutions and contribute to the ever-evolving tech industry.

PROJECT EXPERIENCE

SafePath: Bullying Complaint System for Student Safety with Chatbot Support and Sentiment Analysis   Sep 2024 - Dec 2024

- Designed and developed SafePath, a web-based bullying complaint system focused on ensuring student safety and promoting a supportive school environment.
- Implemented a chatbot feature that provides supportive responses based on the severity of bullying messages (mild, severe, neutral) to guide students through the reporting process.
- Integrated sentiment analysis to categorize complaints and provide appropriate responses, improving student engagement and response times.
- Developed the SafePath AI platform, enabling students to anonymously report bullying incidents with additional options for escalation or follow-up.

Trabahanap – Python-based Job Portal Platform   Oct 2024 – Dec 2024

- Developed Trabahanap, a Python-based job portal platform designed to connect job seekers with employers.
- Implemented user registration and authentication to allow applicants to create profiles and securely log in.
- Enabled application management for employers to track and manage job applications efficiently.

EDUCATION

Bachelor of Science in Infotmation Technology   Aug 2021- Present
Mindoro State University Calapan Campus

- Dean's Lister, 2nd Year, Second Semester, Academic Year 2023–2024
- Currently working on a thesis titled 'Hareneth: CGSD Resource Management System with Predictive Analytics' as part of my capstone project.

Genaral Academic Strand (GAS)   May 2020 - May 2021
San Agustin National High School

- Academic Achiever

ADDITIONAL INFORMATION

- **Technical Skills:** I have experience in basic web development, focusing on creating simple, functional websites with HTML, CSS, and basic JavaScript.
- **Languages:** English, Tagalog
- **Certifications:** Proficient in network addressing, VLAN configuration, subnetting, and DHCP, with hands-on experience in troubleshooting network connectivity issues to ensure optimal performance and reliability.
- **Awards/Activities:** Ranked in the top 86 on WakaTime, with proficiency in JavaScript, EJS, JSON, Markdown, Python, SQL, Bash, HTML, Git configuration, and more.
